HIGHLIGHTS:

For the week, grain and soybean bids finished mixed. Technical maneuvers before USDAÆs production report were the main attraction this week. Good weekly export sales figures for all commodities helped underpin bids. Favorable harvest weather forecasted for the weekend, most crops are already in storage as long lines continue at elevators. Wheat 1 to 6 cents lower except St Louis 4 cents higher. Corn mixed, 4 cents lower to 13 cents higher. Sorghum 3 cents lower. Soybeans 1 to 9 cents higher except Kansas City 3 to 7 cents lower. USDAÆs crop production report showed all wheat production, unchanged from last month at 652 million bushels. Corn production is forecast at 9.55 billion bushels, up 1 percent from last month but down 4 percent from 2000. Yields are expected to average 138.0 bushels per acre, up 1.7 bushels from October. If realized, this would be the fourth largest production and second highest yield on record. Soybean production is forecast at a record high 2.92 billion bushels, up 1 percent from October 1, and 6 percent above 2000. Yields are expected to average 39.4 bushels per acre, up 0.2 bushel from last month and 1.3 bushels above 2000.
